

ROOF FRAMING PLANS

- A. The minimum acceptable scale is 1/4 inch = 1 foot.
- B. Show ridges, hips, valleys, joists, skylights and the size and spacing of the structural members.
- C. Show the roof pitch. Roof pitch less than 3 in 12 requires a membrane roof system.
- D. Include the listing number (ICBO number) for any skylight.
- E. Include two sets of wet-signed calculations for any manufactured truss system.
